

Energy independence?

McCain's ties to Big Oil keep us dependent on Middle East oil.

John McCain has promised to give \$4 billion in tax breaks to Big Oil while it is raking in record profits.¹ He has collected more than \$1.6 million in campaign contributions from oil and gas executives and employees.² McCain isn't serious about getting us off our dependence on foreign oil since he has repeatedly voted against renewable energy, even missing two key votes where he could have been the tie breaker.³

It's time to end our dependence on Middle East oil.
